HAVERO

BLOCKCHAIN SERVICES &
SOFTWARE SOLUTIONS

Welcome

Discover with us infinite possibilities to improve the traceability and transparency of your operations, develop your own smart contracts and get more autonomy and control over the results solving your concerns finding solutions with Haverö consultants, experts in new technologies.

History

H A V E R Ö

In order to create a mining company committed to the Blockchain technology, Haverö was born.

On December 16, 2017 the first Hackathon sponsored by Santiment is organized in OurSpace, Marbella. The "SmartCars" application for renting cars between individuals, using the Blockchain, won one of the prizes, and so the motivation of the team to continue

On February 20, 2018 we settled in Madrid as a base of operations where we began to develop methods of analysis and projects with Blockchain to optimize and solve problems.

Currently, we are working on **SAFEAT**, recommended by the UNWTO (World Tourism organization), a free digital tool, aimed for the hospitality industry. Its main goal is to improve the efficiency and management of orders and guarantee the required security between business owner and client.

**TODAY WE PUT AT YOUR DISPOSAL
ALL OUR ADVANCES.**

Services

In Haverö we put our knowledge at your disposal in order to find and develop solutions that meet the specific needs of your business.

Given the passion of our team for new technologies, we develop all kinds of applications assisted by powerful tools and modern programming languages.

In addition, we build miners configured and optimized according to the investment desired in each project, since the objective is always to achieve maximum profitability and satisfaction.

BLOCKCHAIN SOLUTIONS

We consider any challenge to improve your business, whatever your profile. With the Blockchain technology, we will offer you endless possibilities to achieve an indisputable competitive advantage.

SOFTWARE DEVELOPMENT

We help you identify the technological needs of your business, choose the solution that best suits the company and design a plan to optimize it, with a vision of scalability.

STRATEGIC & TECHNOLOGICAL CONSULTANCY

With our experience in the creation of intelligent contracts and applications based on Blockchain, construction and optimization of mines, maintenance of equipment and analysis of profitability and viability, we can face any challenge.

MINING & SYSTEM MAINTENANCE

Before making a decision, we like to analyze all possibilities. We consider all the variables and parameters to adjust your investment to the best technical configuration, in this way, each machine is designed to achieve the highest profitability.

Partnerships

Our agreements with reputable collaborators in different parts of the world endorse us as creative, innovative, dedicated and committed professionals.

Procomex | São Paulo, Brasil

Haverö actively collaborates with the Alianza Procomex Institute, an alliance of 84 business associations in Brazil with projects in Latin America for the pro-modernization of logistics in foreign trade.

The first work initiative has been the development of the technological update of the Procomex Institute platform, the operational arm of the Procomex Alliance, in which the Haverö developers team has worked intensively in order to create an intuitive, simple platform, adapted to the needs of the market.

Haverö will continue to actively collaborate with the Alliance Procomex Institute and propose innovative solutions for the improvement of processes through Blockchain technology

UNWTO | Madrid, Spain

We are ever so happy to have been recommended by the UNWTO (World Tourism Organization) as a means to reactivate tourism and support the hospitality industry with the creation of SAFEAT.
