

In a SAFEAT establishment,
You don't just order food, you also make friends by scanning a QR

WHAT IS SAFEAT FOREVER?

If your establishment has been nominated for the **SAFEAT FOREVER** program, you will have access to **all the features of the tool for free, for life.**

The **target** of the program is to know the needs of your business and go adapting SAFEAT to improve your own management.

Thanks to your **feedback**, we can continue to improve the platform to offer a quality service, and in addition, we will be able to maintain our support to the most vulnerable establishments with the SAFEAT LITE version.

Take a look at what we already have ready for you ... :)

1. Difficul venue management

When the restaurant is at its full capacity, the main priority is to serve quickly and by doing this, there is no attention to data analysis, such as: order timeframe, preparation time, how long have the customers stayed...

2. Complex digital services and high prices

The installation of the of the system in charge of managing the orders is complex. Clients have to register and the business owners have to dedicate too much time introducing menu information. In addition, it is expensive and not everyone can afford it.

3. Long waiting time

All the customers at a restaurant or bar, have experienced long waiting times when making their orders, asking for the bill or any other enquiries.

4. The new normal in health and the environment

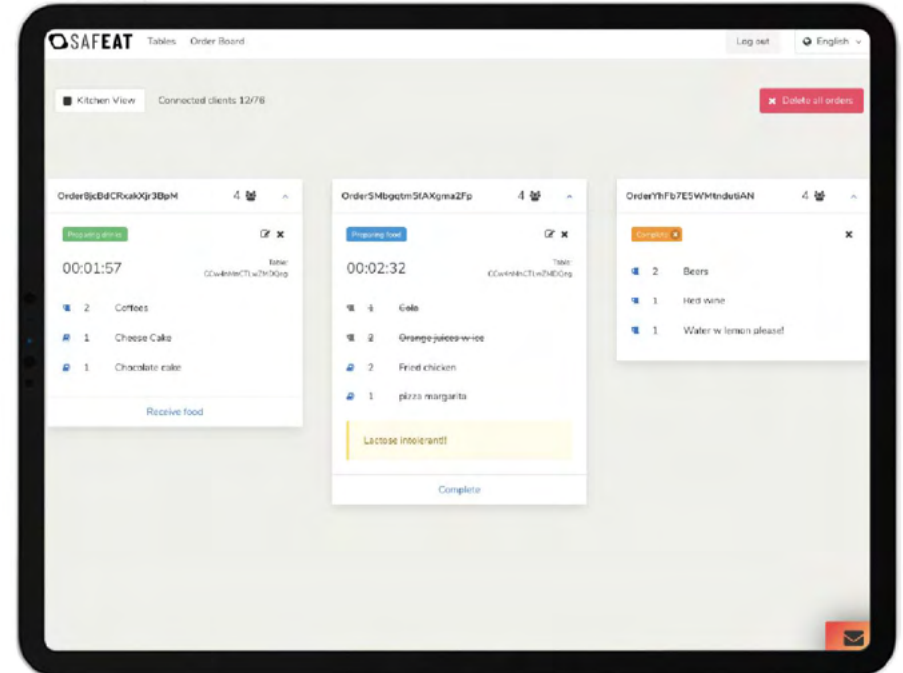

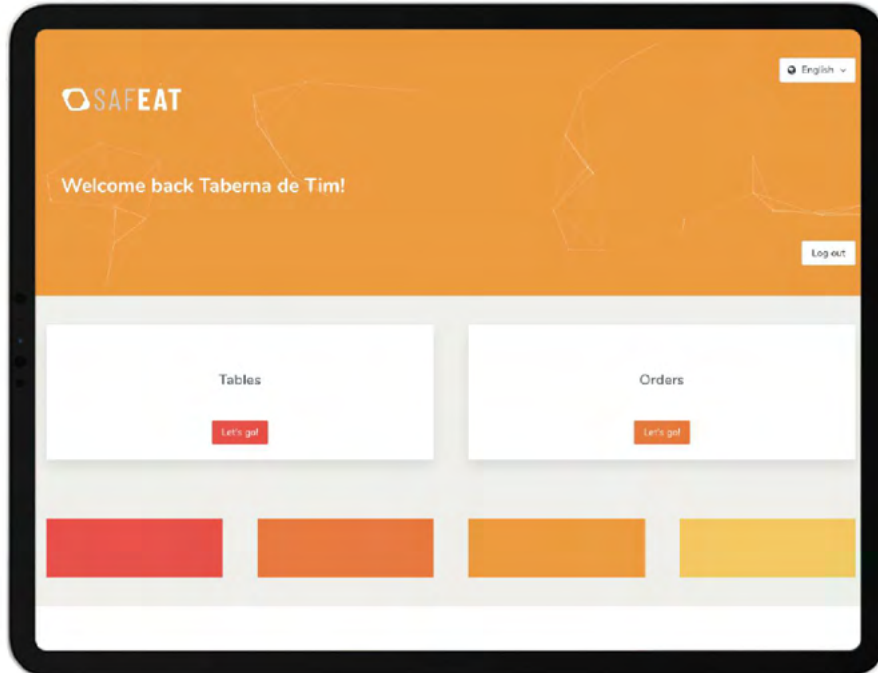

Following the new security protocols in hospitality is complex and makes environmental awareness more complicated, due to the new social and economic situation.

Solution

A simple and flexible web platform where **hospitality professionals only need to:**

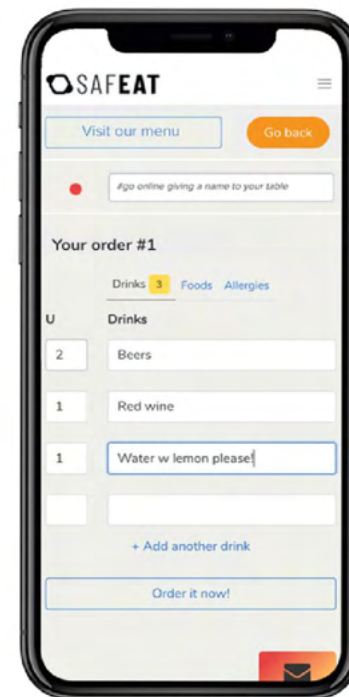

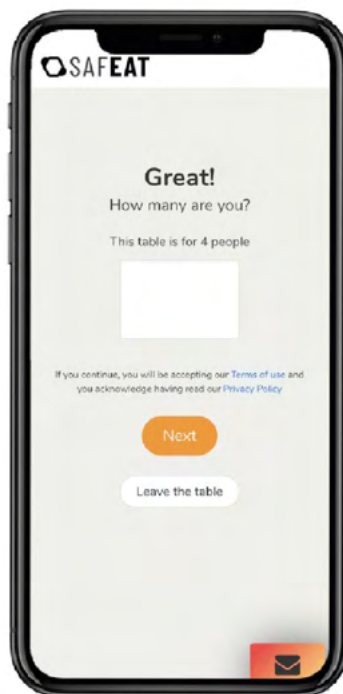

1. Register
2. Print the QR codes per each business place.
3. Receive and manage orders

Solution

More importantly, clients will **not need to download anything nor register**, just:

1. Scan the QR code
2. Write and send the order as if it were a digital note pad
3. Make as many orders as you want, until you ask for the bill

1. GEO-Social applications are dangerous and start to get boring to meet friends or have fun

People are tired of building new relationships using apps to meet people virtually without seen each other. It's known that these kind of apps are full of fake accounts, prostitution, ilegal acts...

2. People are requesting human and safe contact

How many times have you wanted to interact with a person next to you, but feel ashamed, sometimes you open the geo-social app to try your luck, but most of the time without success.

Solution

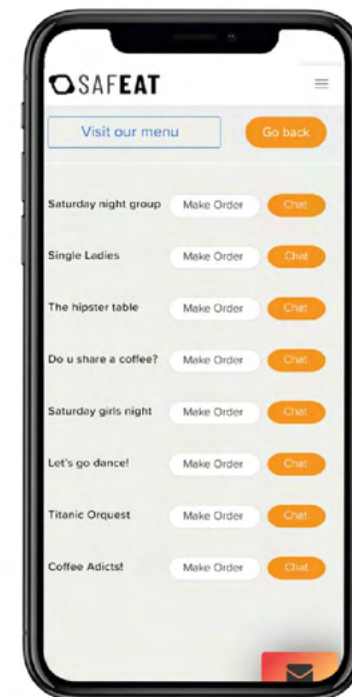

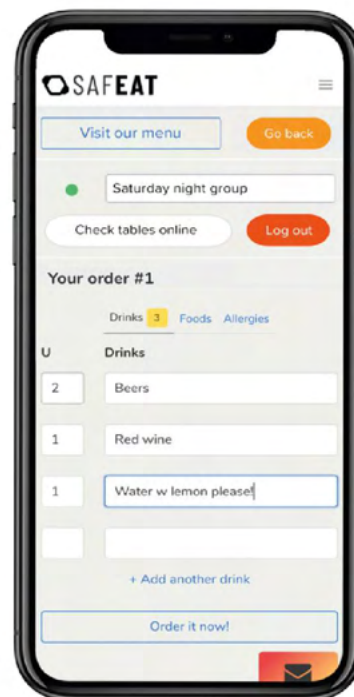

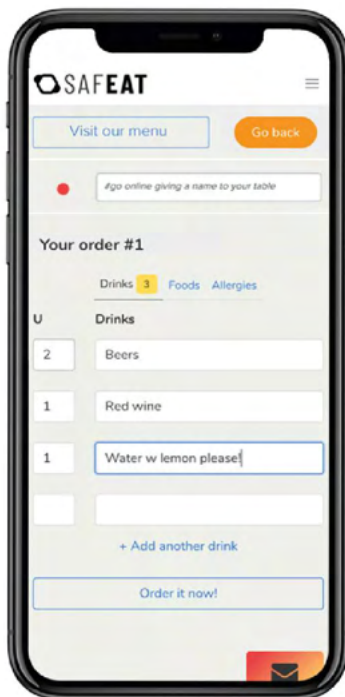

Inclusive and Funny

Everyone can enjoy the platform to make new friends or have fun in a safe, public place! Without logging in, without downloading anything, just by scanning a QR code

It is not another Geo-Social app, It is a new concept, Safe & Local

Let people decide if they want to be online or not, if yes, they have to give a name to the table and start to play with another tables, how? For example, invite other tables for a drink, open a chat and much more!

Product 4 owners

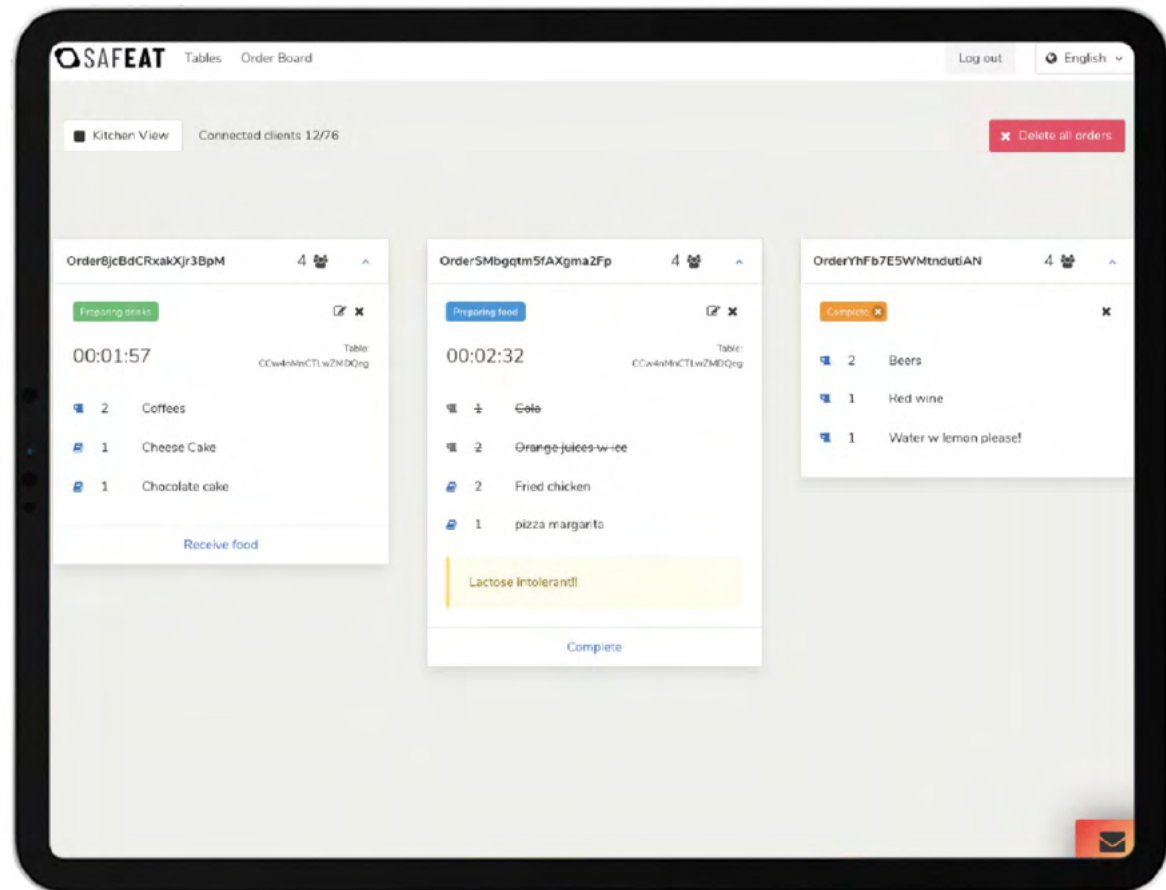

Kitchen view only for food & Bar view only for drinks

Time management

Status indicators

Capacity control

Online chat

Product 4 clients

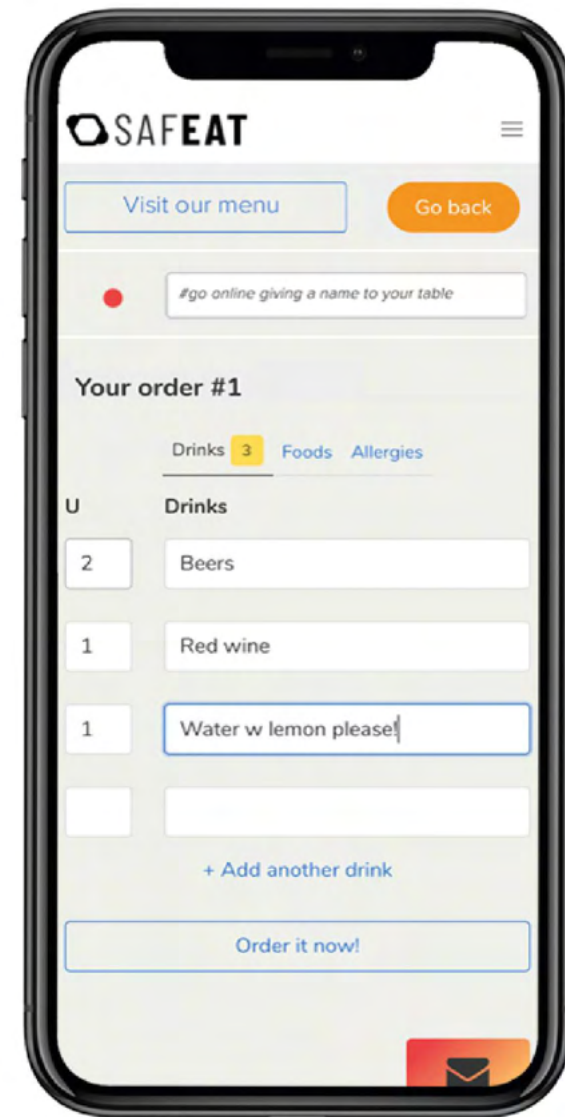

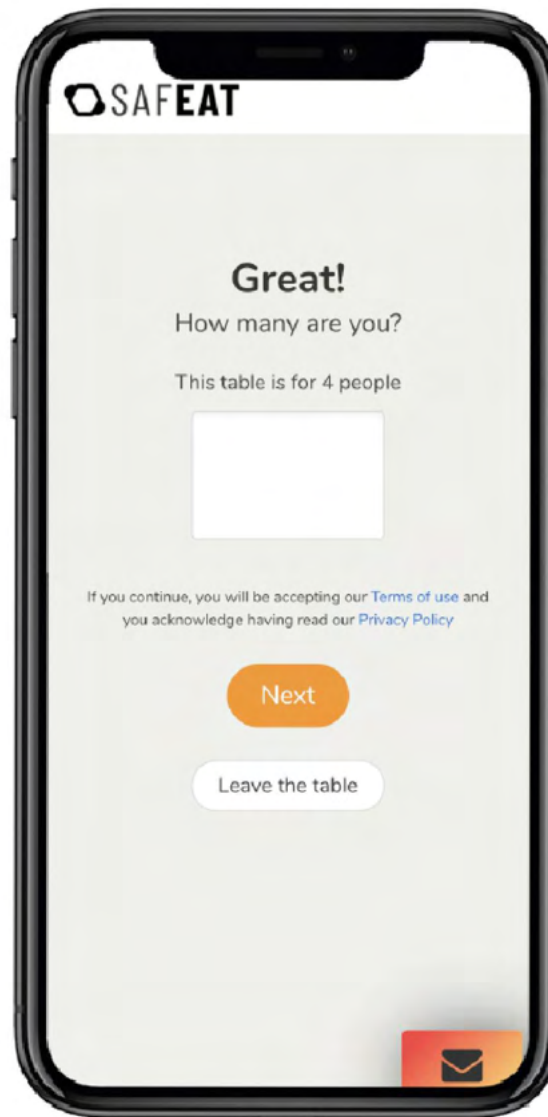

1. Scan the QR code
2. Indicate number of guests
